

Vineyard 4-Armed Sprayer

A sprayer intended for spraying against diseases and pests in edible vineyards.

- Three-point harnessed sprayer used for spraying edible vineyards.
- Bellows producing strong airflow perfectly covering the entire cluster and ensuring maximal agent penetration on both sides of the leafage.
- Two bellow outlets optimizing agent coverage on the leafage.
- Two lower air outlets with built-in spring protectors against obstacles.
- 20 sprinklers with a valve for each sprinkler for mechanical control by the operator.
- Spraying control by a mechanical valve/computer/electric valve.
- Centrifugal bellow with 4 air outlets.

Technical Specifications

Control	Mechanical/Electrical/ Computerized
Number of Sprinklers	20, 5 per air outlet
Type of Sprinklers	Cone jet
PTO HP	70+ HP
Shaft	3-point
Shaft Type	Harnessed
Tank Size	1000-2000 liters
Tank Material	Stainless Steel
